KAHUHO CHARLES MBITHI

Software Developer

Makueni, Kenya | +254 115655221 | charleskahuho78@gmail.com | devcharles.me | github.com/Alaric-senpai | linkedin.com/in/kahuho-mbithi-0305bb254

PROFESSIONAL SUMMARY

Versatile full-stack developer with a recently completed BSc in Computer Science and hands-on experience building responsive web applications, scalable backend architectures, and mobile apps. Proficient across the modern JavaScript/TypeScript ecosystem with growing expertise in mobile development via React Native/Expo. Experienced in API documentation (Swagger/OpenAPI, Mintlify, Viabl) and automated testing (Vitest), with a strong habit of documenting technical processes for team handoff. Demonstrated ability to manage the full development lifecycle — from UI implementation and database design through to production deployment on Linux. Seeking an ICT-related internship to apply technical skills in a professional, team-based environment.

EDUCATION

Bachelor of Science in Computer Science
Dedan Kimathi University of Technology — Nyeri, Kenya
September 2022 – February 2026

- Completed a final-year capstone project
- Coursework spanned software engineering, databases, and systems design

WORK EXPERIENCE

Developer Attachee
Makueni County Government — Department of ICT, education and internship, (Applications Development)
February 2025 – May 2025

- Analyzed complex, enterprise-grade codebases to extract and apply scalable implementation patterns and software architecture best practices.
- Collaborated closely with senior developers in peer-programming and shadowing sessions to accelerate technical proficiency.

- Gained practical exposure to large-scale project workflows, version control systems, and collaborative application development lifecycles.

SELECTED PROJECTS

(Full portfolio: devcharles.me | github.com/Alaric-senpai)

EduBridge — Centralized Learning Management System for Higher Education
Full-Stack Developer | github.com/Edubridgems

- Engineered a comprehensive LMS featuring centralized resource access and integrated online classes for higher education institutions.
- Implemented a secure environment for online proctored assessments to maintain academic integrity.
- Integrated AI-driven assessment marking to automate grading and improve feedback turnaround time for educators.
- Authored comprehensive REST API documentation via Swagger/OpenAPI (published on Bump.sh) and covered core logic with Vitest unit tests.
- *Stack: TypeScript, Next.js, LMS, AI Integration, Swagger, Vitest*

Nexaura (formerly Lynkr) — Niche Social Networking Platform for Software Developers
Mobile & Full-Stack Developer | github.com/Alaric-senpai/lynkr

- Developed a streamlined, developer-centric alternative to complex professional networks to foster direct community engagement.
- Built scalable social features tailored for developers to connect, collaborate, and share resources.
- *Stack: TypeScript, Next.js, Social Network*

LearnIt Academy — Institute-Based Learning Management System
Frontend & Backend Developer | learnitacademy.app

- Engineered a computer college management system allowing for online intakes and course listings.
- Spearheaded the platform's architectural pivot to re-brand as a general course-offering platform similar to Udemy.
- *Stack: Next.js, Appwrite, Tailwind CSS, TanStack Query, Zustand, shadcn, TypeScript*

TwinCards — Flashcard Study Mobile Application
Mobile Developer | github.com/Alaric-senpai/Twin-Cards

- Built a gesture-driven flashcard app letting students organize study units, create flashcards, and import questions in bulk via CSV.
- Implemented an interactive study mode with swipe navigation, card flipping, and session accuracy tracking.
- Added in-app PDF and PPTX study material viewing with a local-first SQLite/Drizzle ORM database and dark/light theming.
- *Stack: React Native, Expo, Expo Router, Drizzle ORM, SQLite, NativeWind, React Native Reanimated*

Habit Bloom — Gamified Personal Habit Tracking App
Mobile Developer | github.com/Alaric-senpai/Habit-bloom

- Architected a clean, gamified offline app for tracking daily habits and visualizing user consistency.
- Migrated the local database from Expo SQLite to InstantDB to support real-time offline and online data synchronization.
- Implemented mood tracking features integrated directly into the core habit-building loop.
- *Stack: React Native, Expo, TypeScript, Drizzle ORM, SQLite, Gamification*

Pesa Sync — Offline Personal Finance Tracker
Mobile Developer | github.com/Alaric-senpai/pesa-sync

- Developed an offline personal finance record-keeping app using Expo, SQLite, and Drizzle ORM.
- Implemented intuitive user flows to track money lent to or by others, maintaining a clear record of repayment flows and personal debt.
- *Stack: React Native, Expo, TypeScript, SQLite, Drizzle ORM*

Echoplain — Blogging Platform
Frontend Developer | echoplain.social

- Built and deployed a full-featured blogging platform utilizing Next.js, Firebase for database/auth, and Tailwind CSS.
- *Stack: Next.js, Firebase, shadcn, Tailwind CSS, TypeScript*

VetConnect — Veterinary Clinic Management System
Frontend & Backend Developer | github.com/Alaric-senpai/Vetconnect

- Built a PHP-based management system for small to mid-sized vet practices, handling appointment scheduling, medical records tracking, and pet management.
- *Stack: PHP, Tailwind CSS, SQL, MariaDB*

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, HTML/CSS, SQL, Dart, Rust

Frontend: Next.js, React, Angular, Tailwind CSS, Bootstrap, Material UI, shadcn, Ant Design, Chakra UI

Backend & APIs: Node.js, NestJS, Express.js, Laravel, Deno, Bun

Mobile Development: React Native, Expo, NativeWind, Uniwind, Flutter

Databases & BaaS: PostgreSQL, MySQL, MariaDB, Prisma ORM, Drizzle ORM, Firebase, Supabase, Appwrite, InstantDB

Documentation & Testing: Swagger/OpenAPI, Bump.sh, Mintlify, Viabl, Vitest

Tools & Environments: Git, GitHub, Figma, Linux, VS Code, AWS
